

Dear I,

In the most comprehensive investigation to date of health professionals' involvement in the CIA's "enhanced" interrogation program (EIP), [Physicians for Human Rights has uncovered evidence](#) that indicates the Bush administration apparently conducted illegal and unethical human experimentation and research on detainees in CIA custody.

Take action today. Tell President Obama to demand that Attorney General Eric Holder investigate these allegations, and if a crime is found to have been committed, prosecute those responsible.

PHR's new report, [**Experiments in Torture: Human Subject Research and Evidence of Experimentation in the 'Enhanced' Interrogation Program**](#), is the first to provide evidence that CIA medical personnel engaged in the crime of illegal experimentation after 9/11, in addition to the previously disclosed crime of torture.

The CIA appears to have broken all accepted legal and ethical standards put in place since the Second World War to protect prisoners from being the subjects of experimentation. Not only are these alleged acts gross violations of human rights law, they are a grave affront to America's core values.

In their attempt to justify the war crime of torture, the CIA appears to have committed another alleged war crime — illegal experimentation on prisoners. The apparent experimentation and research appears to have been performed to provide legal cover for torture, as well as to help justify and shape future procedures and policies governing the use of the "enhanced" interrogation techniques.

Email President Obama today to demand that Attorney General Holder be ordered to open an investigation into alleged illegal and unethical human experimentation and research on detainees in CIA custody.

PHR's investigation into alleged medical experimentation has made front page news: [The New York Times](#), [Washington Post](#), the [Associated Press](#), [Mother Jones](#) and [Salon.com](#), as well as major influential blogs such as [Boing Boing](#), [FireDogLake](#), [Balkinization](#) and the [Washington Post's On Faith blog](#), have all published stories today based on our new report. These alleged acts represent a war crime and a make a mockery of the practice of medicine. Take action today — and [share this report with 6 friends](#). Obama must demand an immediate investigation into these allegations. The integrity of America's commitment to human rights and international law stands in the balance.

Sincerely,

A handwritten signature in black ink, appearing to read 'Frank Donaghue', is written over a white background.

Frank Donaghue, Chief Executive Officer
